

Weifield Electrical Service Division

## ELECTRICAL SYSTEM MONITORING SERVICES

### HOW IT WORKS

## Personalized Access to Real-Time Information

Reliable electrical systems are vital for businesses to maintain their 24/7 operations. Compromised system quality can damage costly equipment, disrupt daily operations, and reduce productivity. Facility managers need sophisticated tools to monitor their electrical system quality, critical electrical infrastructure, and server capacity. Weifield Electrical Services can create a powerful all-in-one platform for real-time insights into your portfolio of assets. We can provide a variety of features and capabilities that can help you optimize your business operations, make data-driven decisions, and achieve your sustainability goals.

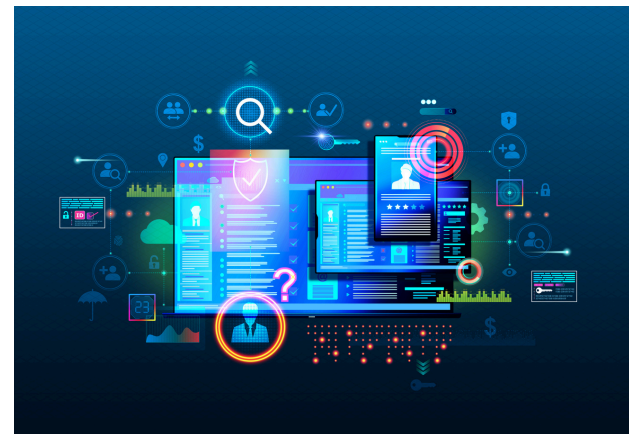

In the dynamic environment of modern commerce, the efficiency and dependability of electrical systems is crucial. Weifield's experienced commercial electricians can fill this gap with reliable, fast response services.

TECHNOLOGY-DRIVEN

CONTINUOUS DATA

### WHAT WE DO

## Solutions to ensure uninterrupted functionality

**Our solutions provide data on system status, energy usage, load, and other key indicators. We offer real-time monitoring via our UL-certified central monitoring station and remote notification tools, allowing our clients to receive information the way they want, when they want.**

*Your systems are the lifeblood of your business operations; trust Weifield and be assured of expert care for your investment*

THE RIGHT SOLUTION FOR PEACE OF MIND

# Proactive plans to **identify and address** areas of improvement.

## Weifield's System Monitoring Approach

- Provide risk management solutions to ensure consistent, reliable power
- Employ standardized monitoring tools to manage power capacity
- Trend and track critical loads to maximize facility capacity
- Develop effective facility command centers to provide essential information to perform at peak efficiency
- Remotely monitor critical technology rooms in real time (e.g., temperature, humidity, volts, amps, kVa, harmonics)
- Improve decision-making through run manuals and defined processes

## KEY FEATURES & BENEFITS

### Enhanced Agility

We enhance your agility through trending analysis—allowing you to easily view changes in the physical infrastructure and optimize availability within your system operations. Multi-device support manages an extensive range of devices, including single-phase and three-phase options, power distribution units, cooling and environmental devices, and other subsystems in the larger system.

### Continuous Availability

We ensure your availability through real-time alarm notifications via phone or email as critical events occur, allowing for reduced mean time to recovery, improved efficiency, and maximized uptime. Our expert 24x7 support provided by experienced electricians provides 24-hour emergency service for your physical infrastructure, alleviating the strain on your internal support resources.

### Fail-Safe Reliability

Our dependable system monitoring solutions cater to mission-critical needs across diverse sectors, providing flexible solutions designed to meet current and future demands. We work closely with clients from consultation through installation to address present challenges and anticipate future needs.

### Convenience

We offer flexibility and convenience through a data channel of system information and a system dashboard where you can view system status, 24/7. Our proactive service response ensures that physical infrastructure threats can be anticipated, identified, and resolved—quickly and accurately.
