

Weifield Group Electrical Contracting

PRE-JOB PLANNING CAPABILITIES

Setting the Foundation for Success

Weifield's Pre-Job Planning department is a strategic response to the complexities and early procurement of modern construction projects. Our goal is to ensure that every project begins with a solid foundation, reducing risks and enhancing the chances of success. By implementing this department, we aim to:

- **Enhance Communication and Collaboration:** By integrating departments such as VDC, Purchasing, and Prefabrication from the start, we foster better communication and collaboration to support our pre-job planning process.
- **Increase Project Predictability:** Thorough pre-job planning reduces uncertainties, leading to more predictable project outcomes.
- **Optimize Resource Utilization:** Through detailed planning and project layout, we ensure that all resources are used effectively and efficiently.
- **Improve Client Satisfaction:** Our clients benefit from smoother project execution, timely delivery, and high-quality results.

Our Commitment to Excellence

Weifield's Pre-Job Planning department focuses on thorough front-end project planning to ensure success. This initiative leverages best practices developed since 2009 and addresses recent industry challenges to improve efficiency and integration across multiple departments.

To plan
successfully,
timing is
everything.

The goal of the pre-job planning timeline is to complete all relevant steps ahead of mobilization. At times, there may be scheduling conflicts that work against this goal.

Our comprehensive pre-job planning training helps our team members address paths to mitigate these types of disruptions to the planning stage of the project.

PROVEN PROCESS

- ① *Scripting a successful 'beach landing'*
- ② *Clearly defining what 'done' looks like*
- ③ *Uncovering any gaps or issues*
- ④ *Clearly articulating the rational for following the process*
- ⑤ *Capturing what has not worked well in the past to improve future processes*
- ⑥ *Generating a plan to build the project that aligns financial goals, means and methods, purchasing, & field execution*

OUR CAPABILITIES

Comprehensive Planning and Preparation

We equip our field supervisors and project managers to anticipate challenges and act proactively, ensuring detailed planning that aligns financial goals, methods, purchasing, and field execution with industry best practices.

Seamless Integration

We fully integrate VDC, Purchasing, and Prefabrication from the start to avoid misalignments and inefficiencies. Our Pre-Job Planning Manager ensures cohesive communication and alignment among all parties involved.

Accountability and Support

We hold all team members accountable for supporting field operations. Via a thorough review of the project execution plans, we can mitigate any gaps and ensure adherence to planning and construction processes.

Continuous Improvement

We track and evaluate the effectiveness of initial planning activities, making adjustments as needed. By capturing and implementing best practices, we continually refine our planning processes.

Your Pathway to Success Begins Here
